

SOLUTION OVERVIEW

An advanced digital procurement solution

Experience an innovative platform that simplifies freight tendering, boosts market transparency, and more

Trimble Freight Procurement enables shippers and logistics providers to navigate today's challenging and complex freight tendering landscape. Our modern digital platform helps to optimize the entire tendering journey and overcome the burdens of an ever-changing market.

Automatic offer validation

Minimum and maximum price specifications, mandatory fields, predefined units, fixed offer structure and much more help to avoid an influx of poor quality offers

Carrier database and communication

Gain access into a rich network of thousands of pre-vetted carriers, and simplify bid communication to reduce manual errors, boost transparency, and keep every stakeholder aligned

Combinatorics for complex tendering

Unique freight combination features allow users to optimize tendering for large, multi-variable freight tenders; thereby, enhancing time efficiency and supplier selection

Deep integrations

Seamlessly integrates with our suite of Transportation Management solutions, enabling connectivity to complimentary freight visibility, auditing, and other services for complete end-to-end support

Freight Procurement advantages:

- Automates repetitive processes to significantly reduce administrative workload & turnaround time
- Reduce freight costs, up to 19%*, via increased competition and auctioning functions
- Compliance-driven workflows minimize errors & mitigate risks in supplier selection
- 100% transparent and documented bidding process for audit compliance
- Up to 30%* less administrative effort through efficient e-sourcing processes

** Performance metrics are based on EU market Transporeon user data. Actual results in the North American market may vary.*

An efficient and transparent tendering process

- | | | | | | |
|---|--|--|--|---|---|
| 01 | 02 | 03 | 04 | 05 | 06 |
| Service provider search among thousands of detailed and verified profiles | Optional pre-qualification via Request for Information (RFI) | RFQ creation with a guided process on the platform | Transparent and secure bidding process | Bid analysis with combinatorial scenarios and extensive reports | Direct allocation via the platform or invitation to further negotiation |

Freight Procurement is the ideal solution for streamlining your cumbersome freight tendering process. Learn more or schedule a demo today: transportation.trimble.com/products/freight-sourcing/freight-procurement
