Trimble

Trimble Expert Fuel

SOLUTION OVERVIEW

Modern route fuel optimization

Lower fuel costs and boost driver compliance with automated, real-time route fuel planning.

Trimble Expert Fuel calculates optimal fuel purchases along a route using daily pricing. Delivering stop suggestions directly to in-cab telematics helps fleets significantly cut fuel spend while streamlining operations.

Fuel location management

Auto-import OPIS and vendor fuel locations, prices, and discounts. Easily edit stops, build networks, and apply custom rates via a web interface.

Smart fuel planner

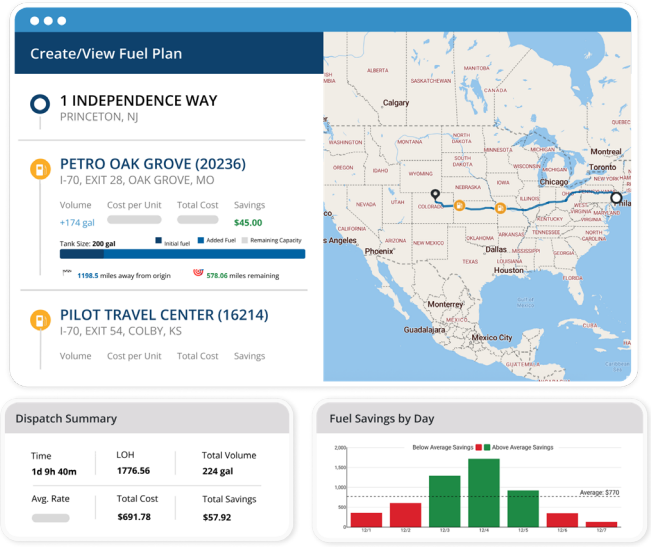

Auto-create fuel plans straight from your TMS. Operations teams can easily tweak rules, test scenarios, and troubleshoot routes for optimal results on every load.

Compliance reporting

Compare actual fuel buys to recommended plans. Easily spot off-plan stops, detect potential theft, and quantify total business savings for your fleet.

Flexible integration

Connect via Trimble Fleet Hub to add stops to driver workflows. Flexible, modern APIs support custom integrations and non-Trimble Transportation Management Systems.

Key solution highlights

- Daily OPIS and fuel card price updates
- In-cab driver routing and fuel stop recommendations
- Off-plan purchase and theft alerts
- Web portal for ops managers and dispatchers
- REST APIs for seamless TMS integration

Maximize fuel savings, driver compliance and operational efficiency with automated route optimization by Expert Fuel. Contact our team to learn more: **cyndi_meurrens@trimble.com**
