

THE CONNECTED ADVANTAGE:

THE BEST TRUCKS AROUND JUST GOT A WHOLE LOT SMARTER

As a dealer representative for Kenworth, your trucks now come factory-fit with the ConnectedAdvantage™ of the Mobile Gateway™ – giving fleet customers the advantage of custom tailored fleet management solutions. And giving you the advantage of selling the smartest trucks around.

With the ConnectedAdvantage – drivers, equipment and fleet managers can now stay connected to the information they need when they need it. All they need to do is choose a display, tablet or mobile device and contact Trimble® to activate Fleet Management services.

CONNECTED
ADVANTAGE

KENWORTH
TRUCKTECH+
Remote Diagnostics

Trimble is PACCAR's exclusive provider for TruckTech+, Kenworth's remote diagnostics solution installed in Class 8 trucks. This partnership is also the foundation of the PACCAR Solutions portal, where fleets and dealers can view real-time vehicle health monitoring information and analytics.

Kenworth's TruckTech+ is powered by Trimble's integrated vehicle health monitoring system. TruckTech+ remote diagnostics allows fleets to better manage the uptime of their equipment by delivering enhanced fault code analysis, actionable data and expert recommendations to prevent unplanned service events.

The hardware component of TruckTech+ is the Mobile Gateway™ (MG) which also provides connectivity to our cloud-based ConnectedFleet® Platform, allowing fleets to connect all devices and access vehicle data through a single piece of hardware. Kenworth trucks pre-installed with the Mobile Gateway™ and wiring provisions save fleet customers installation time and cost when they choose our Fleet Management telematics solution.

THE CONNECTED ADVANTAGE:

NOBODY KNOWS MORE ABOUT HELPING FLEETS RUN SMARTER, SAFER AND MORE PROFITABLY THAN TRIMBLE.

Our people are fleet experts, who pinpoint needs and magnify opportunities for Kenworth fleet customers. Trimble's platform offers the most powerful and comprehensive capabilities in the industry. And our connected services partner network is comprised of over 150 companies to deliver results. Dedication to improving performance and moving fleet management forward means we're here to help you and your fleet customers grow. Trimble can provide solutions for ELD compliance, fuel savings, video intelligence, driver mobility and much more.
