

Kenworth T700 Power Connections

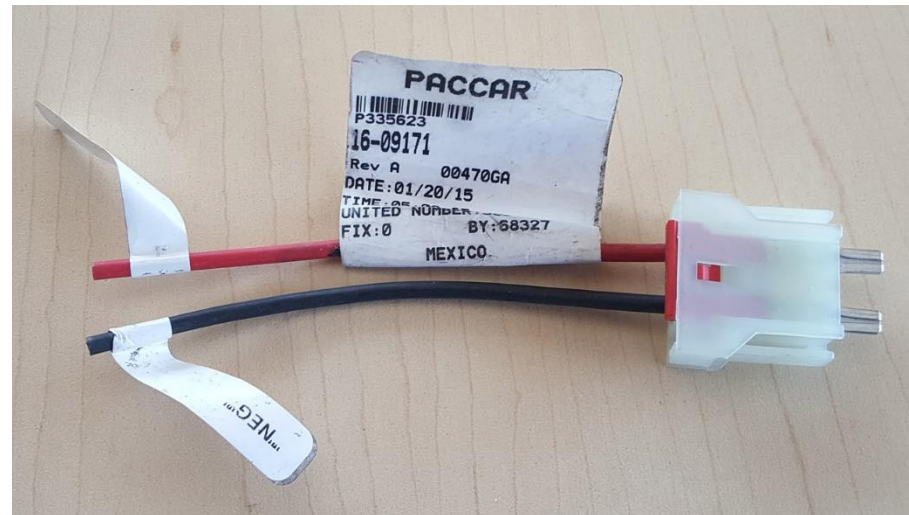

Kenworth T700 - Special Parts Recommendations

Kenworth spare power, ignition, and ground ports require a connector for a proper connection. Installation without this not recommended, as standard spade connectors can lose contact.

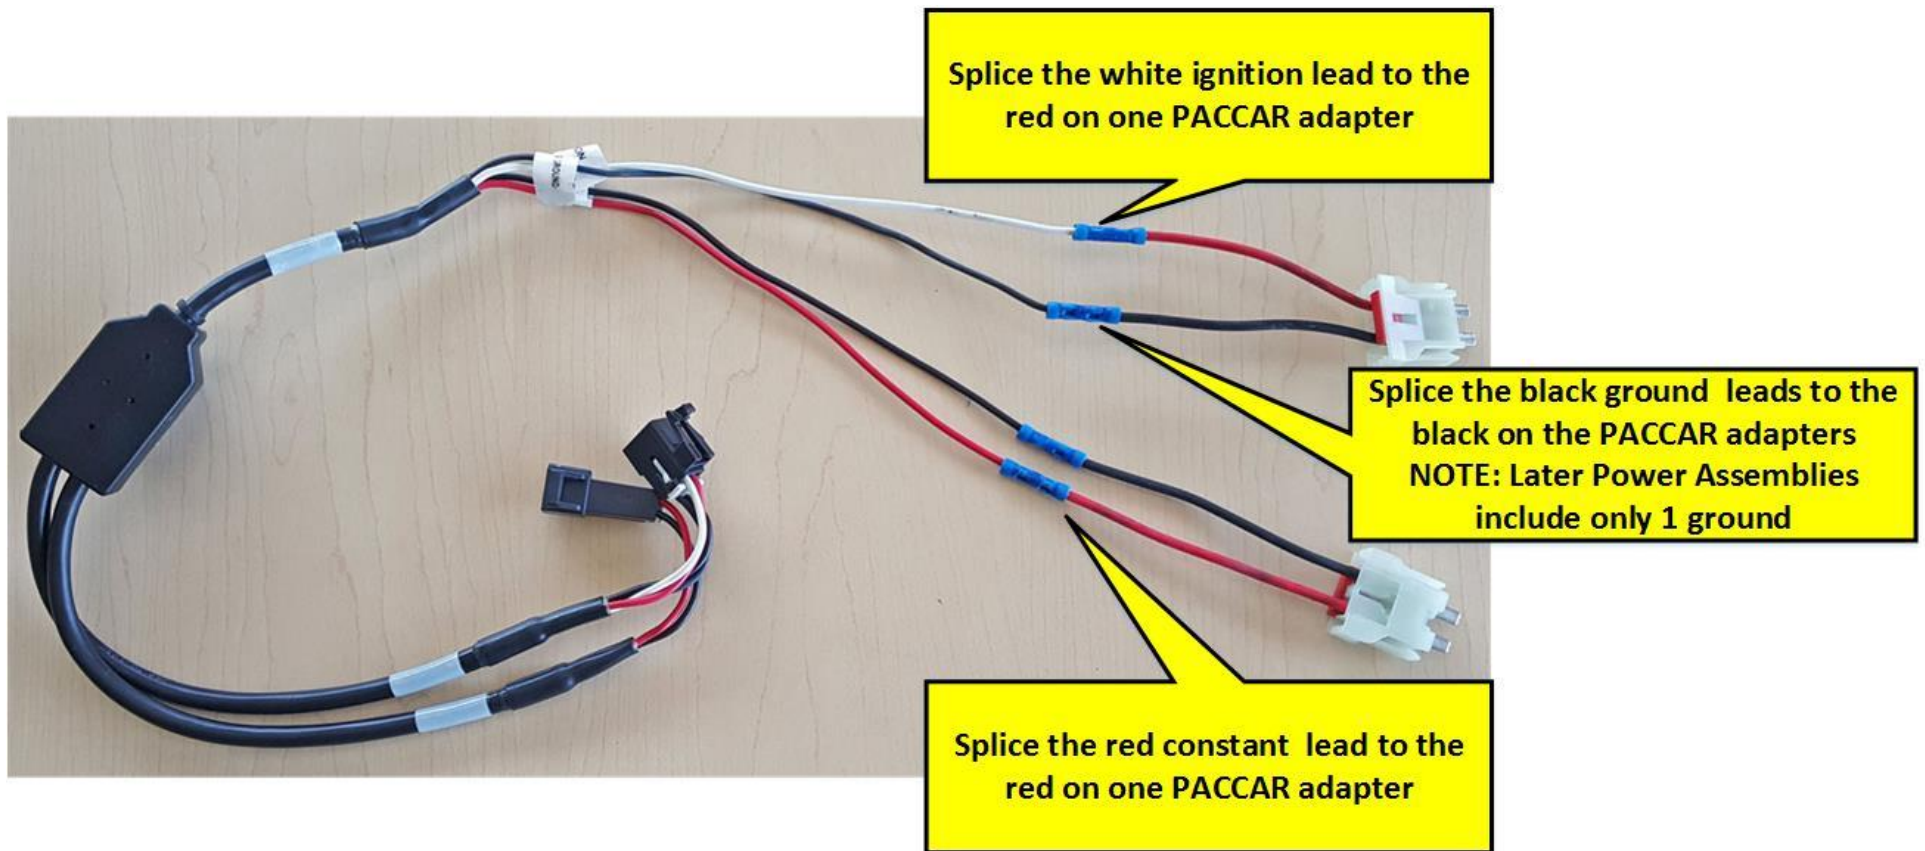

PACCAR/Volvo Power Connector (2 per vehicle)

PACCAR Part 16-09171

This connector can be purchased from any Peterbilt Dealership.

Assembly

Fuse Connections

Connect the PeopleNet Power Assembly to the fuse panel behind the glovebox, with the constant power (red lead) connection on any of the 3 BAT positions and the ignition sense (white lead) on any of the 3 IGN positions.

Fuse the corresponding position for each connection.
