

Real. Fast.

3 clicks. That's all that separates you from better equipment decisions, improved fuel economy, better driver management, identifying fuel theft, and much more. Vusion's Performance Monitoring Dashboard gives you a real picture of your fleet — in real time — so you can analyze, educate and react to operational data to optimize business performance.

VUSION

Now you see it.

Decisions, decisions.

You now have infinite capability — on the fly — to see what's really going on in your fleet. Precision analytics is not only within your reach, it's right at your fingertips. Better decisions on equipment, vehicles, fuel and driver performance? We'll leave that for you.

Integrate. GPS, Fuel, ECM, Dispatch Data all comes together in one place — your desktop. All together now, "Wow!"

Configure. Configure the data the way you want it. What do you want to know? Click. Click. Good. Your data, matched to your needs.

Dive. Chart. Graph. Crunch. Repeat. Analyze to your fleet's content. Turn days into mere moments. You'll be amazed at what you can see.

See what you can do.

■ Improve fuel economy.

Identify opportunities to improve efficiency and economy: vehicle-by-vehicle, engine-by-engine, and even driver-by-driver. Vusion's KPI's with embedded analytics help you zero in on the best ways to move the needle.

■ Make smarter spec'ing decisions.

What vehicles and equipment should you buy? Vusion's data modeling process and MPG reporting accounts for external factors such as idle time, over-rpm, engine size, over-speed, and load weight to provide fleets with a clear picture of vehicle performance.

■ Manage driver behavior.

Which driver behaviors cost you the most money? Assign fuel costs to driver behavior, including: idle time, over RPM, over speed and excess speed.

■ Identify fuel theft.

Do you have a fuel theft issue? By combining fuel purchase information with tank level data Vusion can help identify drivers stealing fuel.

■ Eliminate fuel-tax headache.

Vusion's full service fuel tax solution brings together GPS, ECM odometer readings and fuel purchase data to provide fleets with completed IFTA and Road-Use Tax returns. Sophisticated algorithms alongside industry expertise allow Vusion to handle the data cleaning and editing.

Vusion is a data integration and analytics company that helps fleets ease their IFTA fuel tax burden and make more predictive decisions about equipment and people.
