

Bypassing weigh stations to save you money.

With this fully automated bypass service, your drivers spend less time at roadside vehicle inspection sites and more time in-route—reducing delivery delays and wasted fuel. The result: significant savings to your bottom line. Unlike other bypass programs, Drivewyze™ PreClear requires no transponder or additional hardware. Drivewyze™ PreClear offers a more convenient and safer alternative because it works hands-free on your in-cab device, eliminating the need for driver interaction.

- Maximizes ROI through time and fuel cost savings
- Provides more weigh station bypass sites than any other service provider
- Grows business with increased driver retention and fleet efficiency
- Two-mile advance notification of all U.S. weigh stations gives your drivers time to prepare
- Allows bypass opportunities at both fixed weigh stations and mobile inspection sites

FEWER WEIGH STATION STOPS MEAN BETTER ROI.

Less waiting and more driving = significant savings.

According to a FMCSA study, every weigh station bypassed can save a carrier at least \$8.68 in time and fuel costs. Over the course of a year, avoiding unplanned delays at weigh stations and inspection sites can really improve the bottom line. Drivewyze™ PreClear helps maximize opportunities of weigh station bypasses—especially for fleets with good safety and compliance records. In addition to direct cost savings, less unplanned delays mean better just-in-time service, and higher driver retention.

Unsure how much time and money your fleet is spending at weigh stations today? Drivewyze™ PreClear also offers a free, no-risk Analytics Service, which can show you the real, hidden costs your fleet is incurring from unplanned delays due to weigh station pull-ins. This robust reporting provides a cost-benefit analysis to help you make an informed, no-risk decision about the benefits of using Drivewyze™ PreClear.

How Drivewyze™ PreClear works.

Drivewyze™ PreClear uses GPS-based technology to provide convenient, safe and secure automated bypass service at fixed weigh stations and mobile inspection sites, including previously unserved or underserved U.S. regions. Drivewyze™ PreClear is the only bypass service available in Maryland, Maine, New Hampshire, Vermont, Rhode Island, Connecticut, Pennsylvania, Minnesota and Nevada.

Unlike other bypass programs that require dedicated transponders in every truck, Drivewyze™ PreClear works through PeopleNet in-cab devices—including the devices you may already have installed today. No additional hardware is required.

This service notifies the driver of an upcoming inspection site 2 miles out through the hands-free in-cab communications device. Based on your carrier records and other standard information checks set by each state enforcement agency, drivers receive permission 1 mile out to either bypass or pull into the inspection site.

Visit <http://drivewyze.com/coverage-map/> for the Drivewyze™ PreClear state coverage map.

What are the benefits?

- Delivers significant ROI to carriers by reducing wait time, delivery delays and wasted fuel
- Integrates into PeopleNet devices
- Provides bypass opportunities at both fixed weigh stations and mobile inspection sites
- Alerts drivers through simple screen notifications and audible alerts
- Hands-free operation complies with federal and state distracted driving regulations
- Ensures data privacy. No personal or proprietary data is stored on in-cab devices or transmitted during operations

System Requirements

- Vehicles operating in North America
- PeopleNet onboard device
- PeopleNet Mobile Software
- PeopleNet Vehicle Management
- IE 4.0+, HTML email
