

PeopleNet ConnectedDriver

Stay Connected On-The-Go.

Fleet Mobility Solutions—Wherever You Are.

PeopleNet ConnectedDriver™ brings daily work directly to a driver's mobile device. Through this companion application to the Trimble system, drivers can now receive important updates and information while away from the vehicle – including dispatches, hours of service availability and messages.

Please note that you must be a Trimble customer to use this app. If you are interested in signing up, please visit mobility.trimble.com to learn more.

One requirement of the ELD Mandate is that a driver's HOS information be visible outside of the cab during roadside inspections. With ConnectedDriver, your drivers can easily display their HOS data to an inspector, helping to ensure compliance and speeding up the roadside inspection process.

CONNECTED LIKE NEVER BEFORE.

Features & Functionality

- ▶ Home screen dashboard to view trip information.
- ▶ View trip history, current trips and future trips.
- ▶ View trip details and notes based on route information, ETA and appointments.
- ▶ View miles traveled, gallons of fuel consumed and MPG.
- ▶ Message history available for all vehicles.
- ▶ eDriver Logs® Summary Overview.
- ▶ Read-only messaging.

First Time Users

It's normal for there to be no information in the app immediately after first use. Data will appear after the user logs in, and messages or trips are sent to or from a vehicle the driver is linked to.

Login

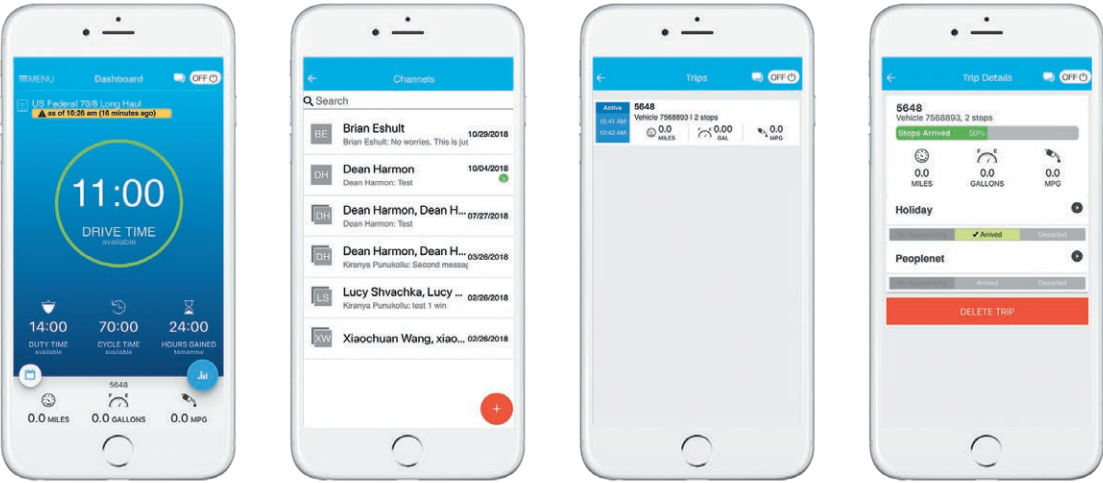

The driver must know his/her Company ID, Driver ID and Password to log in to the application.

Hours of Service

The driver log information that's displayed is date and time stamped on the home screen. The date and time shown represents the last time the truck was synced with the PeopleNet Fleet Manager™. Please note this data is near-real time and will update based on your company settings for check-calls or service calls made by the device, vehicle gateway or software. The Trimble in-cab device is accurate and will always show the actual time in which a duty status was made and display current hours of service clocks and timers. The ConnectedDriver App is not a certified AOBDR (FMCSA 395.15) and is solely used for informative purposes.

Messaging

The messaging feature will display all vehicle messages sent to the driver. The messages that the driver sends from the in-cab display will not appear on the application until a call is made from the truck to the PeopleNet Fleet Manager.

Provide Feedback:

Let us know what you think of the mobile app through the feedback option under 'Menu.'
