

# Drivewyze® PreClear

Bypassing Weigh Stations To Save You Money.

Keep your drivers out of weigh stations and deliver loads faster. This service allows drivers to bypass scales and inspection sites, reducing delivery delays and wasted fuel.

Unlike other bypass programs, Drivewyze PreClear doesn't require a transponder or any additional hardware. The service works hands-free on your in-cab Trimble device, offering a more convenient and safer alternative to transponders.

- ▶ Maximizes ROI through time and fuel cost savings.
- ▶ Grows business with increased driver retention and fleet efficiency.
- ▶ Allows bypass opportunities at both fixed weigh stations and mobile inspection sites.
- ▶ Provides more bypasses at more locations in more US states and Canadian provinces than any other bypass service.
- ▶ Two-mile advance notification of all U.S. weigh stations gives your drivers time to prepare.

**FEWER WEIGH STATION STOPS MEAN BETTER ROI.**

## Less Waiting And More Driving = Significant Savings

Avoiding unplanned delays at weigh stations and inspection sites can significantly impact your bottom line. Providing more bypasses at more sites than any other provider, Drivewyze PreClear maximizes your opportunities to save time and money.

In addition to time and money savings, Drivewyze PreClear helps improve your fleet's safety by reducing lane changes, lineups on the highway and merges. Drivewyze PreClear can also help improve your driver recruitment and retention. A recent Drivewyze survey showed that drivers are three times more likely to work for a company that provides weigh station bypass.

Unsure how much time and money your fleet is losing at weigh stations today? Drivewyze PreClear offers a free, no-risk Analytics Service, which can show you the real, hidden costs your fleet is incurring from weigh station delays. This robust reporting won't impact your drivers, and provides a cost-benefit analysis to help you make an informed, no-risk decision about the benefits of using Drivewyze PreClear.

## How Drivewyze PreClear Works

Drivewyze PreClear uses GPS-based technology to provide convenient, safe and secure automated bypass service at fixed weigh stations and mobile inspections sites, including previously unserved or underserved regions.

Drivewyze PreClear is the only bypass service available in Maryland, Maine, New Hampshire, Vermont, Rhode Island, Connecticut, Pennsylvania, Minnesota, New York, Nevada and Ontario, Canada.

Visit <http://drivewyze.com/coverage-map/> for the Drivewyze PreClear state coverage map.

## What Are The Benefits?

- ▶ Delivers a quick ROI to carriers
- ▶ Integrates into Trimble devices - no transponders are required
- ▶ Improves driver safety
- ▶ Enhances driver recruitment and retention
- ▶ Provides new value-added services beyond weigh station bypass
- ▶ Risk-free trial using the Analytics Service

## System Requirements

- ▶ Vehicles operating in North America
- ▶ Trimble Mobile Software™
- ▶ Trimble Vehicle Management™
